ECO (ATLANTIC) OIL & GAS LTD.

MANAGEMENT'S DISCUSSION AND ANALYSIS
FOR THE THREE AND NINE MONTH PERIODS ENDED
DECEMBER 31, 2024
Expressed in US Dollars

Prepared by:
ECO (ATLANTIC) OIL & GAS LTD.
7 Coulson Avenue
Toronto, ON, Canada, M4V 1Y3
February 26, 2025

Introduction

The following Management's Discussion and Analysis (the "**MD&A**") of the financial condition and results of operations of Eco (Atlantic) Oil & Gas Ltd. and its subsidiary companies (individually and collectively, as the context requires, "**Eco Atlantic**" or the "**Company**") constitutes management's review of the factors that affected the Company's financial and operating performance for the three- and nine-month periods ended December 31, 2024. This MD&A has been prepared in compliance with section 2.2.1 of Form 51-102F1, in accordance with National Instrument 51-102 – Continuous Disclosure Obligations. This discussion should be read in conjunction with the audited consolidated financial statements of the Company for the year ended March 31, 2024, together with the notes thereto, as well as the Company's unaudited condensed interim consolidated financial statements for three- and nine-month periods ended December 31, 2024 (the "Financial Statements"). These documents have been prepared in accordance with International Financial Reporting Standards ("I**FRS**") issued by the International Accounting Standards Board ("**IASB**") and interpretations of the IFRS Interpretations Committee. The unaudited condensed interim consolidated financial statements have been prepared in accordance with International Standard 34 - Interim Financial Reporting.

This MD&A contains forward-looking information that is subject to risk factors including those set out under "Forward Looking Information" below and elsewhere in this MD&A, including under "Risks and Uncertainties". **All amounts are reported in US dollars**, unless otherwise noted. This MD&A has been prepared as at February 26, 2025, unless otherwise indicated.

For the purposes of preparing this MD&A, management, in conjunction with the board of directors of the Company (the "**Board**"), considers the materiality of information. Information is considered material if: (i) such information results in, or would reasonably be expected to result in, a significant change in the market price or value of Eco Atlantic common shares; (ii) there is a substantial likelihood that a reasonable investor would consider it important in making an investment decision; or (iii) it would significantly alter the total mix of information available to investors. Management, in conjunction with the Board, evaluates materiality with reference to all relevant circumstances, including potential market sensitivity.

Certain information and discussion included in this MD&A constitutes forward-looking information. Readers are encouraged to refer to the cautionary notes contained in the section Forward-Looking Statements at the end of the MD&A.

Cautionary Note Regarding Forward-Looking Information

Statements contained in this MD&A that are not historical facts are forward-looking information and forward-looking statements as defined in applicable securities laws (collectively referred to herein as "forward-looking statements") that involve risks and uncertainties. These statements relate to future events or the Company's future performance. All statements other than statements of historical fact are forward-looking statements. In certain cases, forward-looking statements can be identified by the use of words such as "plans", "expects" or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates" or "does not anticipate", or "believes", or variations of such words and phrases or state that certain actions, events or results "may", "could", "would", "might" or "will be taken", "occur" or "be achieved".

In making such forward-looking statements, the Company has made assumptions regarding, amongst other things, statements with respect to the future price of petroleum and/or natural gas; capital expenditures; costs, timing and future plans concerning the development of petroleum and/or natural gas properties; permitting timelines; currency fluctuations; requirements for additional capital; government regulation of petroleum and natural gas matters; environmental risks; unanticipated reclamation expenses; title disputes or claims; and limitations on insurance coverage. Forward-looking statements involve known and unknown

risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements. Such factors include, among others, risks related to operations; termination or amendment of existing contracts; actual results of drilling activities; results of reclamation activities, if any; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of petroleum and natural gas; failure of plant, equipment or processes to operate as anticipated; accidents, labour disputes and other risks of the petroleum and natural gas industries; delays in obtaining or failure to obtain any governmental approvals, licenses or financing or in the completion of development activities; as well as those factors discussed in the section entitled "Risks and Uncertainties " in this MD&A. Although the Company has attempted to identify important factors that may cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that cause actions, events or results not to be as anticipated, estimated or intended. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, readers should not place undue reliance on forward-looking statements. These forward-looking statements are made as of the date of this MD&A or as of the date specified in such statement and the Company assumes no obligation to update or revise them to reflect new events or circumstances, except as may be required by law.

Nature of Business and Structure of the Company

The Company's business focuses on the generation of shareholder value through high growth energy projects - primarily through identifying, acquiring, and exploring oil and gas assets.

The Company is Atlantic Margin-focused operating in the Republic of Guyana ("**Guyana**"), the Republic of South Africa ("**South Africa**"), and the Republic of Namibia ("**Namibia**").

The common shares of the Company (the "**Common Shares**") trade on the TSX Venture Exchange (the "**TSXV**") under the symbol "EOG.V", and on the AIM Market of the London Stock Exchange (the "**AIM**") under the symbol "ECO".

Overview of Operations

Offshore Guyana, in the proven Guyana-Suriname Basin, the Company operates a 100% Working Interest ("**WI**") in the 1,354 km^2 Orinduik Block (the "**Orinduik License**") and through a 6.4% interest in JHI Associates Inc. ("**JHI**") is the indirect owner of an interest in the Canje Block (the "**Canje Block**") Offshore Guyana, and PL001 in the North Falkland Basin. Offshore South Africa in the Orange Basin, Eco holds a 5.25% WI in the 17,581 km^2 Block 3B/4B ("**Block 3B/4B")** and on June 5, 2024, Eco announced the acquisition of 75% and Operatorship of Block 1 ("**Block 1**") pending government title award.

In Namibia, the Company holds Operatorship and an 85% WI in four offshore Petroleum Licenses: PELs: 97, 98, 99, and 100, representing a combined area of 28,593 km^2 in the Walvis Basin (the "**Namibia Licenses**").

The Company is in the exploration stage and has not yet commenced principal producing operations other than acquiring and analysing certain pertinent geological data in Guyana, South Africa and Namibia and drilling four (two in Orinduik and two in Canje) exploration wells in Guyana and one in South Africa (on Block 2B). The Company is currently engaged in the exploration and development of its properties, in addition to evaluating the Jethro and Joe heavy oil discoveries offshore Guyana to determine the appropriate appraisal approach.

Significant Developments

Post period end:

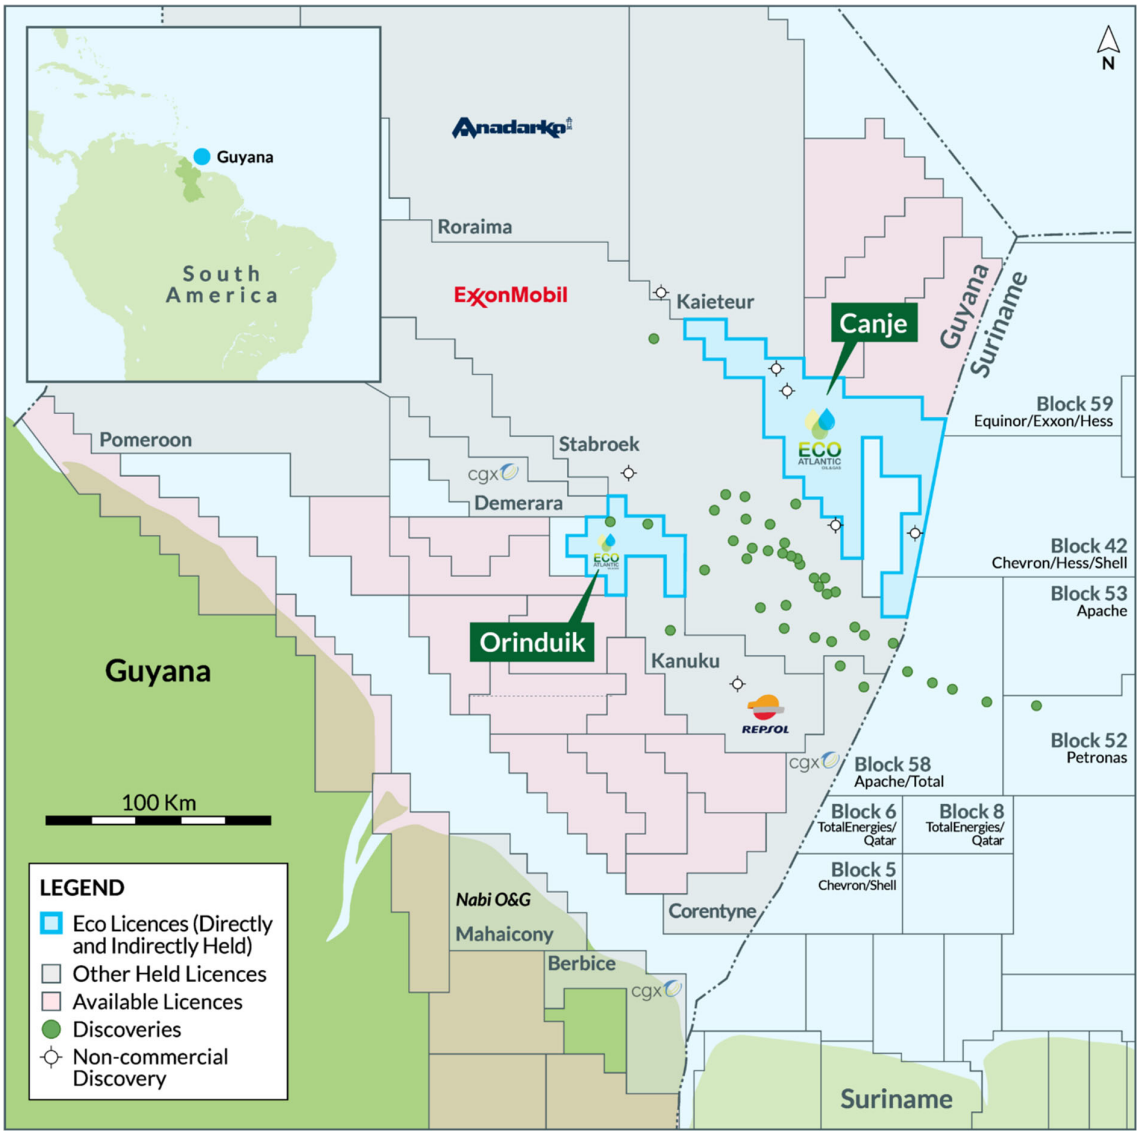

- On January 13, 2025, the Company announced completion of its previously announced transaction with Africa Oil for the sale of a 1% Participating Interest in Block 3B/4B, including the associated Exploration Right and Joint Operating Agreement rights ("**Assigned Interest**"). All conditions precedent were met, including requisite regulatory approvals from the South African Government, TSX Venture Exchange ("**TSXV**"), applicable Canadian Securities Commissions, and the relevant approvals from the Block 3B/4B JV Partners, therefore Azinam Limited ("**Azinam**") assigned the Assigned Interest to Africa Oil SA Corp ("**AOSAC")** and in return Africa Oil transferred the Eco Securities for immediate cancellation ("**AO Completion**"). Eco, through Azinam, now holds a fully carried 5.25% interest in Block 3B/4B Offshore South Africa, reducing from the current 6.25%. As a result of the AO Completion, Africa Oil is no longer a shareholder in the Company and no longer has the right to appoint a director to Eco's Board of Directors. Accordingly, Africa Oil's representative, Oliver Quinn, stepped down from Eco's Board of Directors (the "**Board**") with immediate effect, and consequently, Eco announced the appointment of Mrs Emily Ferguson as a Non-Executive Director simultaneously.

- On January 13, 2025, the Company also announced the issuance of Restricted Share Units ("**RSUs**") and stock options to certain directors, officers and consultants of the Company. The Company issued 3,700,000 RSUs to certain Executive and Non-Executive Directors, pursuant to the Eco's Omnibus Incentive Plan as approved at its Annual and Special Meeting held on 27 December 2024 (the "**Plan**").

  In addition, the Company granted, to certain directors, officers and consultants of the Company, stock options to subscribe for 5,610,000 common shares at an exercise price of $CAD0.30 (£0.17) per common share (the "**Options**"). The Options vest in two equal tranches on the date of the grant, and on the first anniversary from the date of the grant. The Options are exercisable, at the recipient's discretion and expire five (5) years from the date of the grant.

GUYANA

Orinduik Block

In 2015, Eco entered Guyana and began negotiations with the government Minister of Natural Resources of the Cooperative Republic of Guyana ("**MNR**") to acquire a 100% interest in Orinduik Block, Guyana. The 1,354 km^2 Orinduik Block governed by the Orinduik License is located 170 km offshore Guyana in the Suriname-Guyana basin and is situated in shallow to deep water (70m-1,400m). The Orinduik Block is adjacent to the ExxonMobil operated Stabroek block. The first ExxonMobil exploration well in Stabroek block, Liza-1, discovered ~one billion barrels of oil equivalent in 2015. Eco was awarded the Orinduik Petroleum License in 2016, alongside JV Partner and Operator, Tullow Oil Plc. ("**Tullow**"), and commenced technical work and seismic survey planning on the block. In 2018, the JV Partners elected to enter Phase Two of the Initial Period under the Petroleum Agreement and Prospecting License, and Eco farmed out 25% WI to Total E&P Activités Pétrolières ("**Total**") in preparation for a two well drilling campaign the following year. In August 2019, Total and Qatar Petroleum strengthened their international partnership globally in which Qatar Petroleum farmed into 40% of Total's 25% holding in the Orinduik Block. On March 15, 2021, the Department of Energy of the Government of Guyana provided final approval for the transfer of the TotalEnergies 25% WI in the Orinduik License to a new company jointly owned by TotalEnergies (60%) and Qatar Energy (40%), namely TOQAP.

In August and September 2019, the Company announced two oil discoveries on the Orinduik License, the Jethro-1 and Joe-1 exploration wells respectively tested Lower and Upper Tertiary ages. Both wells were drilled within budget, with MWD logging tool and conventional wireline, and the reservoirs were high-quality oil-bearing sands with good permeability. Fluid samples taken from both wells were sent for analysis by the Operator, samples recovered from Jethro-1 and Joe-1 were mobile heavy crudes with high sulphur content.

On December 9, 2019, the Partners elected to enter the next exploration phase of the Orinduik License commencing January 14, 2020 through to January 13, 2023, and until the second renewal exploration period which will last until 2026. On February 3, 2020, the Company announced the filing of a National Instrument 51-101 compliant resource report on the Orinduik Block, offshore Guyana showing significant increase in Gross Prospective Resources to 5,141 MMBOE (771 MMBOE net to Eco) from previous estimate of Gross Prospective Resources of 3,981 MMBOE in March 2019.

On August 10, 2023, the Company announced that it had signed a Sale Purchase Agreement (the "**Agreement**") pursuant to which its wholly owned subsidiary, Eco Guyana Oil and Gas (Barbados) Limited, would acquire a 60% Operated Interest in Orinduik Block, offshore Guyana, through the acquisition of Tullow Guyana B.V. ("**TGBV**"), a wholly owned subsidiary of Tullow (the "**Orinduik Transaction**") in exchange for a combination of upfront cash and contingent consideration.

Orinduik Transaction summary:

$700,000 cash payment upon transfer of TGBV's 60% Participating Interest and operatorship of the Orinduik licence to Eco Guyana, to be paid to Tullow Overseas Holdings B.V., the parent of TGBV ("**TOHBV**") on completion of the Orinduik Transaction (the "**Initial Consideration**").

Contingent consideration payable to TOHBV is linked to the success of a series of potential future milestones, as follows:

- $4 million in the event of a commercial discovery;
- $10 million payment upon the issuance of a production licence from the Government of Guyana; and
- Royalty payments on future production - 1.75% of the 60% Participating Interest entitlement revenue net of capital expenditure and lifting costs.

On November 15, 2023, the Company announced the approval of the transfer of 60% WI and Operatorship in the offshore Orinduik Block in Guyana from the Minister of Natural Resources, Republic of Guyana ("**MNR**").

On January 22, 2024, as Operator, Eco Orinduik, gave notice to the MNR to enter the Second Phase of the **Second Renewal Period** of the Orinduik License effective as of January 14, 2024. This Second Phase has a commitment to drill one exploration well to the Cretaceous formation during the remainder of the license period which ends on January 13, 2026. Further, Eco advised MNR that TOQAP Guyana B.V (the SPV joint entity held by TotalEnergies and QatarEnergy (60:40) has relinquished their 25% WI for strategic reasons and will not participate in the next phase, and that the former TOQAP Guyana B.V 25% WI will be assigned to Eco Guyana. Subject to the requisite government notifications, Eco will remain the Operator holding 40% WI in Orinduik License through Eco Guyana and 60% WI through Eco Orinduik.

As of the date hereof, the remaining Exploration activities and the aggregate expenditure of such activities as estimated by management based on current costs for the Orinduik License is as follows(1):

Exploration Activities	Expenditure US$	Company's share of Expenditure US$
By January 2026		
• 2nd renewal period – Drill one further exploration well (contingent)	$ 30,000,000	$ 22,500,000
Total	$ 30,000,000	$ 22,500,000

Note: (1) Drilling Exploration activities are not currently committed and cost estimates are based on management estimates for the costs if the relevant drilling exploration activity was to be undertaken as at the date of this document.

JHI ASSOCIATES INC. ("JHI")

JHI is a private company incorporated in Ontario and headquartered in Toronto, Canada.

Canje Block, Guyana

The Company holds a 6.4% interest in JHI, a private company, that holds a 17.5% WI in the 4,800km^2 Canje Exploration Block offshore Guyana. The Canje Block is operated by ExxonMobil and is held by WI partners Esso Exploration & Production Guyana Limited (35%), with TotalEnergies (35%), JHI (17.5%) and Mid-Atlantic Oil & Gas Inc. ("**MOGI**") (12.5%).

PL001, North Falklands

In September 2023, JHI completed an acquisition of 100% Operated interest in PL001 North Falklands Basin Licence, which covers approximately 1,126km^2. PL001 is adjacent to the Sea Lion development (Navitas, Operator (65%) and Rockhopper (35%)), which is reported to contain over 500 million barrels of recoverable oil.

JHI has completed ADF® processing on 550 km^2 of high-quality 3D seismic over the Eastern Graben of PL001 with Apex Spectral Technology of Houston, Texas. This satisfies JHI's work program commitment to the Falkland Islands government for the current license period. A thorough review of the prospect inventory incorporating the results of the ADF® processing is underway.

SOUTH AFRICA

Following the relinquishment of offshore Block 2B, the Company currently holds an Exploration Right for offshore Block 3B/4B and has an Exploration Right application pending final government approval for offshore Block 1.

Block 3B/4B

Azinam owns a 5.25% WI of Block 3B/4B, located between 120-250 kms offshore western South Africa, directly south of the prolific multibillion barrels discoveries offshore Namibia. The block lies in water depths ranging from 300-2500m and covers an area of 17,581 km². The 3B/4B license contains a 10,000 km² GeoStreamer 3D survey shot in 2012, which was reprocessed by the JV partners 2022-2024 and 1,400 km of multi vintage 2D seismic data also spans the license.

On October 27, 2022 the PASA approved the operator's application to extend the Block 3B/4B license (being the first renewal of the Exploration Right) and to move into the first extension period of two years. The deed ratifying such extension was signed on December 15, 2022.

On March 9, 2023, the Company reported that Africa Oil had published an independent, NI 51-101 compliant report of qualified reserves and resources evaluator for Block 3B/4B Offshore South Africa (the "**CPR**"). The CPR was commissioned by Africa Oil and issued by RISC Advisory (UK) Limited, an independent oil and gas advisory firm. Highlights of the report included:

- RISC's analysis of the licence identifies total Unrisked Gross P50 Prospective Resources of approximately 4 billion barrels of oil equivalent ("**BOE**").
- Net (26.25%) to Eco Atlantic, the Net Unrisked Prospective resources are approximately 1.0 BOE.

On March 21, 2023, the Company, and its partners on Block 3B/4B announced that they are applying for Environmental Authorisation to undertake exploration activities in Block 3B/4B. The JV Partners selected a leading South African environmental consulting firm to conduct a comprehensive Environmental and Social Impact Assessment ("**ESIA**") process in preparation to apply for permit to drill one well and one contingent well (and potentially up to five wells) within an area of interest in the Block.

On July 11, 2023, the Company announced that it had signed a legally binding Letter of Intent ("**LOI**") pursuant to Azinam farmed out 6.25% Participating Interest in Block 3B/4B to Africa Oil SA Corp ("**AOSAC**"), a wholly owned subsidiary of Africa Oil (the "**Africa Oil Acquisition**"). Pursuant to the terms of the LOI, the completion of the Acquisition was subject to the satisfaction of customary conditions precedent including, but not limited to, the receipt of requisite regulatory approvals from the government of South Africa and the TSX Venture Exchange (the "**TSXV**").

The consideration for the Africa Oil Acquisition is up to $10.5 million in cash, payable conditional on certain milestones as set out below:

- $2.5 million within 30 days of signing of the LOI (payment received);
- $2.5 million upon government approval for the transfer of the 6.25% interest in Block 3B/4B to Africa Oil (payment received);
- $4.0 million upon the completion of targeted farm out to a third party (payment received); and
- $1.5 million upon spud of the first exploration well in Block 3B/4B.

On January 22, 2024, Azinam received final government approval for the farm out of 6.25% Participating Interest in Block 3B/4B to Africa Oil, as announced on July 11, 2023.

Following such government approval, AOSAC, then held a 26.25% Participating Interest; Azinam, a 20% participating interest; and Ricocure, a 53.75% Participating Interest.

On March 5, 2024, the Company signed a farmout agreement ("**FOA**") pursuant to which Azinam will farm out a 13.75% Participating Interest in Block 3B/4B as part of an aggregate 57% farm down transaction along with its Joint Venture ("**JV**") Partners Africa Oil SA Corp. and Ricocure to TotalEnergies, who will become Operator and QatarEnergy (the "**Block 3B/4B Transaction**"). Upon completion of the FOA ("**Completion**"), Eco will retain a 6.25% interest in Block 3B/4B.

On August 28, 2024, the Company announced the Completion of the FOA after receipt of the requisite regulatory approvals (Section 11) from the government of South Africa. ("**Completion**"), reducing Eco's retained interest to 5.25%. .

The consideration for the FOA was as follows:

- TotalEnergies and QatarEnergy paid Eco a total of $2.5 million (plus VAT) and Ricocure paid Eco $1.6 million;
- Africa Oil paid Eco $4 million;
- Eco's 6.25% share of exploration costs will be covered by the JV partners up to a limit of approximately $13.5 million representing a total block carry of $212m; and
- Further payments, amounting to $11.5m will be payable to Eco from TotalEnergies, QatarEnergy and Africa Oil on spudding of the first exploration well.

Following Completion, TotalEnergies, the Operator of the Block, held a 33% Participating Interest; QatarEnergy International E&P LLC, held a 24% Participating Interest; Africa Oil SA Corp, a wholly owned subsidiary of Africa Oil Corp., retained a 17% Participating Interest; Azinam Limited, a wholly owned subsidiary of Eco Atlantic, retained a Participating Interest of 6.25%; and Ricocure retained a 19.75% Participating Interest.

On September 16, 2024, the Department of Mineral Resources and Energy for the Republic of South Africa granted the Company environmental authorization to drill one well and one contingent well (and potentially up to five wells) within an area of interest in the Block. The legislative notification and appeals process is in progress with the relevant regulatory agencies.

On July 29, 2024, the Company announced the signing of an agreement to sell a 1% interest in Block 3B/4B South Africa in exchange for cancellation of all of Africa Oil's shares and warrants in Eco (worth ~C$11.5 million)

On January 13, 2025, post period end, the Company announced the completion of its transaction with Africa Oil for the sale of a 1% Participating Interest in Block 3B/4B, and the replacement of a member of the board. Azinam assigned a 1% Participating Interest in Block 3B/4B offshore the Republic of South Africa, including the associated Exploration Right and Joint Operating Agreement rights ("**Assigned Interest**") to AOSAC in exchange for the cancellation of all common shares of no par value in the Company ("**Common Shares**") and warrants over Common Shares ("**Warrants**") held by Africa Oil (the "**Exchange Transaction**").

The following conditions precedents were satisfied; requisite regulatory approvals from the Government of the Republic of South Africa, under Section 11 of the Mineral and Petroleum Resources Development Act, TSX Venture Exchange, applicable Canadian Securities Commissions, and the relevant approvals from the Block 3B/4B Joint Venture Partners.

Eco now holds a fully carried 5.25% interest in Block 3B/4B Offshore South Africa, reduced from 6.25%. Following the cancellation of Africa Oil's previously held in aggregate, 54,941,744 Common Shares (valued at c.$CAD11.5m as at July 29, 2024) (the "**Share Cancellation**") and 4,864,865 Warrants (collectively, the "**Eco Securities**"), the outstanding common share capital of the Company is now reduced to 315,231,936 Common Shares and 48,541,666 warrants.

Block 2B

Azinam South Africa owned 50% WI of Block 2B, which is located in the Orange Basin and covers 3,062 km^2 off the west coast of South Africa 300 km north of Cape Town with water depths ranging from 50 to 200 metres. The Gazania-1 exploration well drilled on the block, spudded on October 10, 2022, reached target depth of 2,360m but did not show evidence of commercial hydrocarbons. The well was plugged and abandoned as planned. The JV partners undertook well logging and a detailed analysis of the results.

On June 5, 2024, the Company notified PASA, being the regulator for the Government of South Africa, of its intention to relinquish its 50% WI Operated offshore Block 2B in South Africa where it drilled its 2022 Gazania-1 well offsetting the AJ-1 oil discovery. The Company has completed all necessary documentation, and environmental audits, following acceptance by the PASA of this relinquishment, the Company will have no further liability in respect of Block 2B.

Block 1

On June 5, 2024, Eco announced the acquisition of Block 1 Offshore South Africa Orange Basin. Through its 100% owned subsidiary Azinam South Africa, the Company will farm-in and acquire a 75% WI from Tosaco and will become Operator of a new Exploration Right (the "**Acquisition**"). Tosaco intends to transfer its remaining 25% Interest to OrangeBasin Oil and Gas (Proprietary) Limited - a newly formed South African entity with a *Broad-Based Black Economic Empowerment* rating.

Block 1 is 19,929km^2 in area and is located on the Namibian Border offshore South Africa. The Eastern side of the triangular shaped block stretches approximately 174km along the shoreline and extends approximately 263km West into deep water in the Orange Basin.

Terms of the 75% WI Farm-in Acquisition are as follows: $150k payable upon signing, $225k payable upon issuance of Section 11 (Government title transfer) and $375k payable upon a TSX-V/AIM compliant Resource Report to be commissioned by Eco. The Company will carry the remaining 25% Interest through the Budget and Work Program for the first three years up to an agreed sum of $2.3 million of a total work program.

The block has significant 2D and 3D seismic data already completed over 5,000km of line 2D and over 3,500km^2 of 3D and no additional seismic acquisition or drilling of wells is planned in the three-year carried period. During this period, Eco will complete the interpretation and analysis required for its planned Work Program with its in-house exploration team. The Farm-in is subject, inter alia, to normal Governmental approvals and no field activity is currently planned that requires environmental permitting.

NAMIBIA

Eco holds an 85% Operating Interest in four licenses in the Walvis Basin, Offshore Namibia: PEL097, Block 2012A 'Cooper License', PEL098, Block 2213 'Sharon License', PEL099, Blocks 2111B & 2211A 'Guy License' and PEL100, Blocks 2211B & 2311A 'Tamar License'.

On February 3, 2021, a new ten agreement for all four Petroleum Exploration Licenses received final governmental approval with 10-year license terms.

Following significant hydrocarbon discoveries offshore Namibia in 2022, Eco Atlantic is witnessing considerable interest in its licenses in Namibia and is currently assessing options to progress its exploration work programmes including a potential farm-out.

PEL097 – Cooper License

The Cooper License covers approximately 5,788 km^2 and is located in Block 2012A offshore in the economical waters of Namibia (the "**Cooper Block**"). The Company holds a 85% WI in the Cooper License, the National Petroleum Corporation of Namibia ("**NAMCOR**") holds a 10% WI, and Tangi Trading Enterprise cc ("**Tangi**") holds a 5% WI. The Company proportionally carry NAMCOR and Tangi's WI during the exploration period.

The Company has license to 1,450 line km of 2D seismic and acquired an 1,100 km^2 3D seismic survey which has been processed and interpreted hosting a defined Cretaceous Stratigraphic Trap drilling prospect ("**Osprey**").

PEL098 – Sharon License

The Sharon License covers approximately 5,700 km^2 and is located in Block 2213 offshore in the economical waters of Namibia (the "**Sharon Block**"). The Company holds a 85% WI in the Sharon License, NAMCOR holds a 10% WI and Titan Oil and Gas (Pty) Ltd holds a 5% WI ("**Titan**"). The Company proportionally carry NAMCOR and Titan's WI during the exploration period.

The Company has license to 3,692 line km of existing 2D seismic data in Sharon Block. The Sharon block possesses multiple structural and stratigraphic style traps.

PEL099 – Guy License

The Guy License covers 11,457 km^2 and is located in Blocks 2111B and 2211A offshore in the economical waters of Namibia (the "**Guy Block"**). The Company holds a 85% WI in the Guy License, NAMCOR holds a 10% WI and Lotus Explorations (Pty) Ltd holds a 5% WI ("**Lotus**"). The Company proportionally carry NAMCOR and Lotus' WI during the exploration period.

The Company has licensed access to 473 km line of Western Seismic 2D data acquired in 2012, 1,012 line km of 2D seismic shot by PGS in 2014 and an 870 km^2 3D seismic survey on the Guy Block. The block covers a portion of the deepest part of the basin and look-alike Venus and Graff leads above the Albian unconformity have been identified. These leads are within the block with possible extensions into the Tamar Block. In addition, a number of channels and fans have been identified as leads to be matured.

On 13 December 2024 the Ministry of Fisheries and Marine Resources recommended Environmental Clearance Certificate for proposed 2D / 3D Seismic Survey over PEL099.

PEL100 – Tamar License

The Tamar License covers approximately 5,649 km^2 and is located in Block 2211B and Block 2311A offshore in the economical waters of Namibia (the "**Tamar Block**"). The Company holds an 85% WI in the Tamar Block, NAMCOR holds a 10% WI and Moonshade Investment (Pty) Ltd ("**Moonshade**") holds a 5% WI. The Company proportionally carry NAMCOR and Moonshades' WI during the exploration period. This block is in deep water with a setting that is similar to Venus. As in the Guy Block, a number of channels and fans have been identified with geobodies characteristic of stratigraphic oil plays.

In August 2024, the Company purchased the license to 1,324 km of existing 2D seismic survey in the Tamar Block area.

On 13 December 2024 the Ministry of Fisheries and Marine Resources recommended Environmental Clearance Certificate for proposed 2D / 3D Seismic Survey over PEL100.

Environmental, Social and Governance ("ESG")

In October 2022, Eco Atlantic underwent a comprehensive review of its ESG practices across all aspects of the business, conducted by Magnolia Consulting.

A stakeholder materiality assessment, industry guidance review and peer reviews identified the key areas of focus for Eco's ESG Strategy and aligned Eco's Social Investment projects ambitions to the United Nations Social Development Goals.

Eco focuses its efforts on the significant social, economic, and environmental impacts that the Company, and the energy industry in general, can have in the countries where it operates. This approach helps make Eco a strategically resilient business – one that delivers value for our host nations, stakeholders, and investors.

Through discussions with its stakeholders, Eco Atlantic considers its ESG priorities to be:

- Climate change
- Community engagement
- Environmental management
- Governance
- Safety
- Social & economic development

Eco is committed to undertaking its business in a safe and efficient manner that minimizes our environmental impacts while ensuring a safe and secure working environment for our staff, contractors and other stakeholders. Adhering to strong ESG principles is fundamental to the delivery of our strategy and solid business results.

The Company aims to meet the highest standards of ESG practices across all aspects of its business. The Company is committed to the countries where it operates – promoting sustainable growth and support for nearby communities. Eco operates as a responsible custodian in compliance with the applicable environmental laws and regulations of the countries in which it operates. This commitment informs every aspect of the business, including how it researches, plans and designs new exploration projects, operates its portfolio, collaborates with stakeholders and reports progress.

As a result of the review Eco's board adopted company policies for ESG; Health and safety; Environmental management; and Sustainable relationships, all of which are reviewed annually and signed by the board and are available on the Company's website page ESG principles and policies.

Environmental Stewardship

Eco Atlantic recognises that oil and gas activities may result in an impact to the environment in its areas of operation. The Company strive to responsibly minimise environmental impacts across the full life cycle of its exploration operations and corporate operations.

- The Company incorporates its environmental policy into its management systems, measures their effectiveness and operates under a principle of continuous improvement.
- The Company obtains and maintains all the necessary permits and licenses for its activities.
- The Company consults with its stakeholders on environmental issues that may affect them.

Responsibility

Eco wishes to develop sustainable long-term relationships in the communities in which it operates.

A growing energy sector can benefit local economies through the creation of direct work opportunities in the industry. More significantly, the sector can have the indirect impact of increasing employment, revenue and support for infrastructure development, education, lodging and restaurants.

In this context, Eco demonstrates its commitment through its decade-old social responsibility programmes, focusing on education and skills development.

Eco has a track record of in-country relationships and ESG engagement and the Company began implementing early-stage social responsibility programmes focused on education in both Namibia and Guyana over ten years ago. A South Africa focused initiative was also initiated with the Company's local community stakeholders in 2022 and has since been expanded in 2024. Eco firmly believes that by supporting the younger generation with the foundation for effective education and the opportunity to gain valuable skills and education tools needed to succeed, the whole country will benefit from growth and prosperity.

Eco is continually developing its management systems to implement its ESG Policies and to develop a suitable reporting framework to measure its effectiveness as part of a process of continuous improvement.

Environmental Regulation

The Company's activities may be subject to environmental regulations, which may cover a wide variety of matters. It is likely that environmental legislation and permitting will evolve in a manner which will require stricter standards and enforcement. This may include increased fines and penalties for non-compliance, more stringent environmental assessments of proposed projects and a higher degree of responsibility for companies, their directors and employees.

The Company does not believe that any provision for such costs is currently required and is unable to determine the impact on its financial position, if any, of environmental laws and regulations that may be enacted in the future due to the uncertainty surrounding the form that these laws and regulations may take.

Financial position

The Company's current operations are focused on South Africa, Guyana, and Namibia.

As at December 31, 2024, the Company had total assets of $27,180,126 and a net equity position of $26,350,816. This compares to total assets of $31,263,638 and a net equity position of $30,018,140 as at March 31, 2024. The Company had current liabilities of $829,310 as at December 31, 2024, as compared with $1,245,498 as at March 31, 2024.

As at December 31, 2024, the Company had working capital of $5,474,956 compared to working capital of $1,849,701 as at March 31, 2024. The Company had cash on hand of $6,027,801 as at December 31, 2024, compared with $2,967,005 as at March 31, 2024, and short-term investments of $75,000 at December 31, 2024 compared with $13,107 as at March 31, 2024.

Summarised Financial Information (in US Dollars)

	Three months ended December 31,		Nine months ended December 31,	
	2024	2023	2024	2023
Revenue				
Interest income	**$ 52,081**	$ 17	**$ 59,592**	$ 1,703
	52,081	17	**59,592**	1,703
Operating expenses:				
Compensation costs	**255,939**	208,201	**727,251**	629,199
Professional fees	**64,689**	89,877	**421,177**	388,437
Operating costs	**550,458**	567,682	**2,097,699**	1,329,063
General and administrative costs	**164,086**	180,744	**478,699**	453,786
Share-based compensation	**-**	-	**-**	95,695
Foreign exchange gain (loss)	**(69,861)**	(111,839)	**7,449**	(12,094)
Total operating expenses	**965,311**	934,665	**3,732,275**	2,884,086
Operating loss	**$ (913,230)**	$ (934,648)	**$ (3,672,683)**	$ (2,882,383)

Exploration and evaluation assets and expenditures

For oil and gas prospects not commercially viable and financially feasible, the Company expenses exploration and evaluation expenditures as incurred. Exploration and evaluation expenditures include acquisition costs of oil and gas prospects, property option payments and evaluation activities. Exploration and evaluation expenditures associated with a business combination or asset acquisition are capitalised.

Once a project has been established as commercially viable and technically feasible, related development expenditures are capitalised. This includes costs incurred in preparing the site for production operations. Capitalisation ceases when the oil and natural gas reserves are capable of commercial production, with the exception of development costs that give rise to a future benefit. Exploration and evaluation expenditures are capitalised if the Company can demonstrate that these expenditures meet the criteria of an identifiable intangible asset.

Interest income

During the three months ended December 31, 2024, the Company earned interest of $52,081 from funds invested in interest bearing deposits with financial institutions, as compared with $17 earned during the three months ended December 31, 2023.

During the nine months ended December 31, 2024, the Company earned interest of $59,592 from funds invested in interest bearing deposits with financial institutions, as compared with $1,703 earned during the nine months ended December 31, 2023.

The increase in interest earned during each period reflects the increase in average cash balances during the period as the Company used its cash reserves to finance its operations and a decrease in interest rates during the period.

Expenses

As operator of the some of its petroleum exploration licenses, the Company bills certain partners for their respective share in certain compensation, operating and administrative expenses on certain of our licenses.

Operating costs

Operating costs include amounts spent on data acquisition, technical consulting and analysis, incurred in connection with the Company's oil and gas licenses.

During the three months ended December 31, 2024, the Company incurred net operating costs of $550,458 as compared to net operating costs of $567,682 for the three months ended December 31, 2023.

During the nine months ended December 31, 2024, the Company incurred net operating costs of $2,097,699 as compared to net operating costs of $1,329,063 for the nine months ended December 31, 2023.

The increase in 2024 relates to increased activities in South Africa and Guyana, compared to the same period last year.

Compensation costs

Compensation costs represent amounts paid by the Company for compensation to certain members of management. It further includes compensation paid to certain of the Company's directors for their services as directors.

During the three months ended December 31, 2024, the Company incurred compensation costs of $255,939 as compared to $208,201 for the three months ended December 31, 2023.

During the nine months ended December 31, 2024, the Company incurred compensation costs of $727,251 as compared to $629,199 for the nine months ended December 31, 2023.

Professional fees

Professional fees represent amounts paid by the Company for professional fees provided to the Company by independent service providers.

During the three months ended December 31, 2024, the Company incurred professional fees of $64,689 compared to $89,877 for the three months ended December 31, 2023.

During the nine months ended December 31, 2024, the Company incurred professional fees of $421,177 compared to $388,437 for the nine months ended December 31, 2023.

The increase in professional fees in 2024 is due to increased activity by the Company as compared to the prior period.

General and administrative costs

General and administrative costs include public company charges, travel and entertainment, occupancy and general office expenditures for the Company's head office in Toronto and its regional office in Guyana, Namibia and South Africa.

During the three months ended December 31, 2024, the Company incurred net general and administrative costs of $164,086 as compared to $180,744 during the three months ended December 31, 2023.

During the nine months ended December 31, 2024, the Company incurred general and administrative costs of $478,699 as compared to $453,786 during the nine months ended December 31, 2023.

General and Administrative costs increased during 2024 as compared to 2023, primarily due to an increase in expenditure on public company costs and insurance.

Share based compensation

The share-based compensation expense reflects the fair value and vesting schedule of Restricted Share Units ("**RSU's**") and stock options granted to directors, officers, employees and consultants of the Company.

During the three months ended December 31, 2024, share based compensation amounted to $nil as compared to $nil for the three months ended December 31, 2023.

During the nine months ended December 31, 2024, share based compensation amounted to $nil as compared to $95,695 for the nine months ended December 31, 2023.

The amount in 2023 relates primarily to RSU's issued and vested during that period.

Foreign exchange

The foreign exchange movement during the nine months ended December 31, 2024, reflects the movements of the Canadian dollar, British Pound, Euro and Namibian dollar relative to the US Dollar. The Company's cash and cash equivalents and short-term investments are held primarily in US Dollars, but the Company also hold funds in in Canadian dollars, British Pounds and Euros.

Summary of Quarterly Results

Summarised quarterly results for the past eight quarters are as follows:

	Quarter Ended			
	31-Dec-24	30-Sep-24	30-Jun-24	31-Mar-24
Total income	$ 52,081	$ 4,300	$ 3,211	$ 5
Net loss for the period	$ (913,230)	$ (1,632,394)	$ (1,127,059)	$ (18,354,619)
Basic loss per share	$ (0.002)	$ (0.004)	$ (0.003)	$ (0.050)

	Quarter Ended			
	31-Dec-23	30-Sep-23	30-Jun-23	31-Mar-23
Total income (loss)	$ 17	$ 21	$ 1,665	$ (26,612)
Net loss for the period	$ (1,100,872)	$ (965,009)	$ (717,399)	$ (604,257)
Basic loss per share	$ (0.003)	$ (0.004)	$ (0.002)	$ (0.003)

Additional Disclosure for Venture Issuers Without Significant Revenue

	Three months ended December 31,		Nine months ended December 31,	
	2024	2023	2024	2023
General and administrative expenses				
Occupancy and office expenses	**$ 17,896**	$ 3,389	**$ 38,668**	$ 31,886
Travel expenses	**80,104**	40,292	**131,552**	79,058
Public company costs	**52,774**	106,152	**260,884**	294,438

Financial services	**3,742**	2,860	**9,974**	9,618
	$ 164,086	$ 180,744	**$ 478,699**	$ 453,786

Liquidity and Capital Resources

The financial statements have been prepared on a going concern basis whereby the Company is assumed to be able to realise its assets and discharge its liabilities in the normal course of operations. The financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate. If the going concern assumption was not appropriate for the financial statements, then adjustments of a material nature would be necessary in the carrying value of assets such as petroleum and natural gas licenses, liabilities, the reported expenses, and the balance sheet classifications used. Management continues to pursue financing opportunities for the Company to ensure that it will have sufficient cash to carry out its planned exploration program beyond the next year.

During the nine months ended December 31, 2024, the Company's overall position of cash and cash equivalents increased by $3,055,437, excluding forex differences. This increase in cash can be attributed to the following activities:

1) The Company's cash used in operating activities during the nine months ended December 31, 2024 was $4,567,536 as compared to cash used in operating activities of $3,536,375 for the nine months ended December 31, 2023. This year over year increase is due primarily to increased operating costs on the Company's licenses.

2) Cash generated in investing activities for the nine months ended December 31, 2024 was $7,622,973 as compared to $1,800,000 for the nine months ended December 31, 2023. This amount relates primarily to income from Block 3B/4B farm-out and the acquisition of Block 1.

3) Cash generated from financing activities for the nine months ended December 31, 2024 was $nil as compared to $nil for the nine months ended December 31, 2023.

As discussed above, the Company is required to undertake specific exploration activities on each of the Company's licenses during each phase of development. (See "Overview of Operations" for information on the Company's commitments.)

The Company is currently engaged in the exploration and development of the licenses in order to assess the existence of commercially exploitable quantities of oil and gas and to determine if additional resources should be allocated to these licenses as per the work program commitments set out herein. The Company has completed the minimum exploration work required to date for each of its material licenses.

The Company has no revenue producing operations and continues to manage its costs, focusing on its higher potential licenses as described above. It may seek funding in the capital markets and may seek to pursue additional joint venture and farm-in opportunities with other suitable companies having access to capital, in order to meet its exploratory commitments and development strategy. Although the Company has been successful in raising funds to date, there can be no assurance that adequate funding will be available in the future, or available under terms favorable to the Company.

Common Shares, Options, RSUs and Warrants

Common shares	315,231,936
Options issued to directors, officers and consultants	11,460,000
RSUs granted to directors, officers and consultants	5,468,000
Warrants*	48,541,666
Common shares outstanding on a fully diluted basis	371,391,602

(*) 20,000,000 warrants are only exercisable in the case of a producible commercial discovery on Block 2B or Block 3B/4B.

Off-Balance Sheet Agreements

As of the date of this MD&A, the Company does not have any off-balance sheet arrangements that have or are reasonably likely to have, a current or future effect on its results of operations or financial condition, including, and without limitation, such consolidations as liquidity, capital expenditure and capital resources that would be considered material to investors.

Contractual Commitments

Licenses

The Company is committed to meeting all of the conditions of its licenses including annual lease renewal or extension fees as needed.

The Company, together with its partners on each license, submit annual work plans for the development of each license, which are approved by the relevant regulator.

Financial Instruments

Other risks and uncertainties the Company faces at present are market risk and foreign exchange risk.

Market risk is the risk of loss that may arise from changes in interest rates, foreign exchange rates and oil and gas prices. An extended period of depressed oil and gas prices could make access to capital more difficult and the Company is dependent on capital markets to fund its exploration and ultimately, its development programs.

Foreign exchange risk arises since most of the Company's costs are in currencies other than the Canadian dollar. Fluctuations in exchange rates between the Canadian dollar and the U.S. dollar could materially affect the Company's financial position. Management periodically considers reducing the effect of exchange risk through the use of forward currency contracts but has not entered into any such contracts to date.

Risks and Uncertainties

The business of exploring for, developing and producing oil and gas reserves is inherently risky. The Company is in the development stage and has not determined whether its licenses contain economically recoverable reserves. The Company's future viability is dependent on the existence of oil and gas reserves and on the ability of the Company to obtain financing for its exploration programs and development of such reserves and ultimately on the profitability of operations or disposition of its oil and gas interests.

The Company's actual exploration and operating results may be very different from those expected as at the date of this MD&A.

For a complete discussion on risk factors, please refer to the Company's Annual Information Form dated July 29, 2024, filed under the Company's profile at www.sedarplus.ca and on the Company's website.

Technical Information

Mr. Colin Kinley, COO, has reviewed and verified the technical content of the information contained in this Interim MD&A.

Transactions between Related Parties and Balances

Parties are considered to be related if one party has the ability, directly or indirectly, to control the other party or exercise significant influence over the other party in making operating and financial decisions. This would include the Company's senior management, who are considered to be key management personnel by the Company.

Parties are also related if they are subject to common control or significant influence. Related parties may be individuals or corporate entities. A transaction is considered to be a related party transaction when there is a transfer of resources or obligations between related parties.

Fees for management services and operating costs paid to directors and officers or private companies which are controlled by directors or officers of the Company were as follows:

The following are the expenses incurred with related parties for the nine months ended December 31, 2024 and 2023 and the balances owing as of December 31, 2024 and 2023:

December 31, 2024:

Change in Accounting Policies

There have been no changes in accounting policies during the three and nine monhts ended December 31, 2024.

Critical Accounting Estimates

The Company's critical accounting estimates are defined as those estimates that have a significant impact on the portrayal of its financial position and operations and that require management to make judgments, assumptions and estimates in the application of IFRS. Judgments, assumptions and estimates are based on historical experience and other factors that management believes to be reasonable under current conditions. As events occur and additional information is obtained, these judgments, assumptions and estimates may be subject to change. The Company believes the following are the critical accounting estimates used in the preparation of its consolidated financial statements. However, actual outcomes may differ significantly from these estimates.The significant estimates and judgments applied in the preparation of these Financial Statements are consistent with those applied and disclosed as the Company' significant accounting policies in Note 3 of the Company's Financial Statements.

Use of estimates

Judgements

i) Impairment of petroleum and natural gas licenses

When there is objective evidence that an asset may be impaired, the Company is required to estimate the asset's recoverable amount. The recoverable amount is the greater of value in use and fair value less costs to sell.

ii) Investment in associates

The Company has determined it holds significant influence over JHI due to its ability to appoint a director to the JHI Board. Accordingly, the Company accounts for its investment using the equity method of accounting in accordance with IAS 28 investment in associates and joint ventures. Management applies its judgements as to whether the Company has significant influence over JHI. If the Company did not have significant influence, it would account for the investment as a financial instrument carried at FVTPL. During the year, the Company identified objective evidence of impairment relating to the Company's investment in JHI and consequently revalued this investment.

Estimates

i) Stock Based Compensation

The Company uses the fair value method, utilizing the Black-Scholes option pricing model, for valuing stock options granted to directors, officers, consultants and employees. The Black-Scholes model is based on significant assumptions such as volatility, dividend yield, risk free rate, estimated forfeitures and expected term.

ii) Impairment Calculation

Determining the value in use requires the Company to estimate expected future cash flows associated with the assets and a suitable discount rate in order to calculate present value.

Disclosure Controls and Procedures and Internal Controls over Financial Reporting

Management has established processes to provide it with sufficient knowledge to support representations that it has exercised reasonable diligence to ensure that (i) the consolidated financial statements do not contain any untrue statement of material fact or omit to state a material fact required to be stated or that is necessary to make a statement not misleading in light of the circumstances under which it is made, as of the date of and for the periods presented by the consolidated financial statements, and (ii) the consolidated financial statements fairly present in all material respects the financial position, results of operations and cash flows of the Company, as of the date of and for the periods presented.

In contrast to the certificate required for non-venture issuers under National Instrument 52-109 – *Certification of Disclosure in Issuers' Annual and Interim Filings* ("**NI 52-109**"), the Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures ("**DC&P**") and internal control over financial reporting ("**ICFR**"), as defined in NI 52-109. In particular, the certifying officers filing this certificate are not making any representations relating to the establishment and maintenance of:

1) controls and other procedures designed to provide reasonable assurance that information required to be disclosed by the issuer in its annual filings, interim filings or other reports filed or submitted under securities legislation is recorded, processed, summarised and reported within the time periods specified in securities legislation; and
2) a process to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with the issuer's GAAP (IFRS).

The issuer's certifying officers are responsible for ensuring that processes are in place to provide them with sufficient knowledge to support the representations they are making in the certificate. Investors should be aware that inherent limitations on the ability of certifying officers of a venture issuer to design and implement on a cost-effective basis DC&P and ICFR as defined in NI 52-109 may result in additional risks to the quality, reliability, transparency and timeliness of interim and annual filings and other reports provided under securities legislation.

Additional Information

Additional information relating to the Company, the Company's quarterly and annual consolidated financial statements, annual information form, technical reports and other disclosure documents, are available on the System for Electronic Document Analysis and Retrieval (SEDAR) website at www.sedarplus.ca and on its website at www.ecooilandgas.com.
